

The desire and market for local fresh food is on the rise. Yet the Piedmont Triad is losing farms and forestry lands at an alarming rate and the local processing and distribution infrastructure for fresh food is lacking.

Person

Piedmont Together aims to strengthen our region by strengthening each city and town in the region. This is being done by taking a comprehensive look at JOBS, HOUSING and TRANSPORTATION - how they can function together and how they relate to creating healthy communities, our development pattern, valuing green infrastructure and preparing for weather extremes. It's no longer good enough for our region to just be competitive. The Piedmont Triad must learn how to be the best example of creating a strong economy built around livable communities.
