

*Nearly 350,000 new jobs will be added to the Piedmont Triad region by 2040. But they are not the jobs of the past; they will require a much more skilled workforce.*

**Piedmont Together** aims to strengthen our region by strengthening each city and town in the region. This is being done by taking a comprehensive look at JOBS, HOUSING and TRANSPORTATION - how they can function together and how they relate to creating healthy communities, our development pattern, valuing green infrastructure and preparing for weather extremes. It's no longer good enough for our region to just be competitive. The Piedmont Triad must learn how to be the best example of creating a strong economy built around livable communities.
