

PLAN 2020 FACT SHEET

ABOUT

Plan 2020 is a strategic planning initiative forging a compelling future for Indianapolis. Plan 2020 defines a new approach to planning in Indianapolis, meshing community vision, values and strategy with an unprecedented, coordinated update to core city government plans. In order to create this multi-faceted and significant long-term vision, Plan 2020 has created five themes that are instrumental to developing a compelling future for Indianapolis.

Plan 2020 will respond to these community themes by identifying how the City of Indianapolis/Marion County can ensure their success. These plans will be much more strategic than typical planning initiatives, and will be honest and transparent about what city government can accomplish.
