

LOS ANGELES MOBILITY ELEMENT

2010 Bicycle Plan Citywide Bikeway System and Proposed Bike Enhanced Streets

User Note:

The Bicycle-Enhanced Network is shown on the map as a bold grey line. Additional layers such as the 2010 Bicycle Plan were added to illustrate how the Bicycle-Enhanced Network will be building upon the existing framework of the Bike Plan. Each layer in this pdf can be turned “on and off” by clicking on the layers icon to the left (in Adobe Acrobat) and checking/unchecking the box next to each layer. We want your feedback on whether or not these streets should receive enhancements that boost their functionality for bicycling. Please give us your thoughts on our online town hall, ideas.la2b.org. The initial public review will continue through March 2013.

Legend

-  Bicycle Enhanced Streets
-  Arterials
- 2010 Bicycle Plan**
-  Backbone
-  Green
-  Neighborhood
-  LA City
